CONTENTS

With over 50 years of experience in designing, engineering, and manufacturing electric heating and hot water appliances the Atlantic brand has become synonymous with premium, high efficiency products. We have built ourselves upon 11 core values that are incorporated into each of our products.

**Quality | Dynamism | Innovation | Modernity
Premium design | Comfort | Elegance |
Efficiency Reliability | Safety | Trust**

Atlantic has engineered and developed an extensive product range that includes panel heaters, electric radiators, towel rails and hot water cylinders. Our innovative, reliable and energy efficient product portfolio offers the perfect electric heating solutions for new builds, bungalows, flats, apartments, hotels, offices and commercial establishments.

Atlantic is dedicated to combining premium design with cutting edge technology to offer all of your total electric heating and hot water solutions.

PANEL HEATERS

By utilising convection heating, electric panel heaters are great at warming up small rooms by heating up aluminium elements within the radiator.

Our Atlantic panel heaters are a cost-effective way of heating homes or apartments by using 100% of the energy needed to quickly warm any space.

Panel heaters are best suited for small rooms like:

Bedrooms | Guest Rooms
Home Offices | Conservatories

F137

PANEL HEATER

The Atlantic F137 electric panel heater utilises convection heating to quickly warm any room and, with its simple cosmetic design, can fit into any home decor with ease.

Equipped with a range of features to make heating the home much easier, along with H-shaped vertical support to provide high-volume easy installations.

ONIRIS

PANEL HEATER

Oniris is a modern and stylish digital electric panel heater that features fast-heating elements encased by an aluminium surface. Two smooth and curved grooves create this aesthetically pleasing panel heater design.

This heater includes occupancy detection, which automatically reduces heat if the room is empty, as well as open window detection that reduces the heater's heat output. With these features, Oniris is both efficient and convenient, making it a smart choice for any modern home.

FLUID FILLED RADIATORS

Atlantic's fluid-filled electric radiators (also known as oil-filled electric radiators) feature built-in encased heating elements that are submerged in specially formulated heating fluid to provide incredible heat-up times.

All of our radiators are made from high-grade aluminium, which quickly heats up the room while providing a sleek and modern style, they are an excellent choice for anyone looking to improve their home's comfort and appearance.

Fluid-filled electric radiators are best suited for:

**Living room | Kitchens | Bedrooms
Hallways | Dining Rooms**

ACCESSIO

ELECTRIC THERMOFLUID RADIATOR

The Accessio is an easy to use electric, heat conducting fluid-filled radiator that delivers consistent long-lasting heat as a result of integral thermofluid technology. Not only that, user friendly digital controls and an electronic thermostat can help homeowners achieve energy savings of up to 25% versus conventional electric heating solutions.

COZYTOUCH: INTELLIGENT PROGRAMMING

Atlantic's range of Cozytouch compatible electric heating appliances features built-in motion sensor technology on the front of each unit. This allows the electric radiator to detect whether someone is in the room and automatically adjust itself to the ideal temperature. If the system detects no movement within the room, the electric heating appliance will automatically lower its temperature output to an economy setting, reducing energy consumption and running costs.

Setting up the Cozytouch system is simple, with no complicated programming required. During the first week of operation, the Cozytouch electric radiator scans and monitors

the room to detect patterns of usage and builds an intelligent daily schedule based on these patterns. This means that each room (or zone) is warmed up before it becomes occupied, providing comfort and luxury with ease. The Cozytouch smart system repeats its automatic daily and weekly scans to continuously adapt to the user's lifestyle.

In addition to this, Cozytouch also provides the user with real-time monitoring capabilities and full control over their heating. The user can remotely control each appliance individually within the property, making it easy to adjust heating settings and reduce energy usage.

IMPROVING YOUR EPC AND ENERGY SAVINGS

Lighting

LED bulbs are a highly energy efficient way to light a room using up to 90% less energy and lasting up to 25 times longer when compared to incandescent or halogen bulbs. Using LED bulbs can add a positive impact to your EPC rating and potentially save you up to £232 a year.

Loft Insulation

Improving your loft and home insulation is one of the best things to do to help reduce heat loss and improve your EPC rating. Adding 270mm of insulation to your loft and home will help improve heat retention within the property and can help save up to £395 a year.

Double Glazing

Upgrade your windows to double glazing can help improve your properties' energy performance and help reduce noise. Installing double glazing can reduce heat loss by 54% and could save up to £235 a year.

Chimney Capping

Did you know 60% of UK houses were built in the 1960's with chimneys? Chimney's waste up to 90% of the home heat due to emitting the heat through the chimney into the open environment. Capping the chimney is a quick and simple solution to increase the properties heat retention and help provide cost savings as well as improve your EPC rating.
