Experts in **Electric Heating and Hot Water**

AGILIA IO
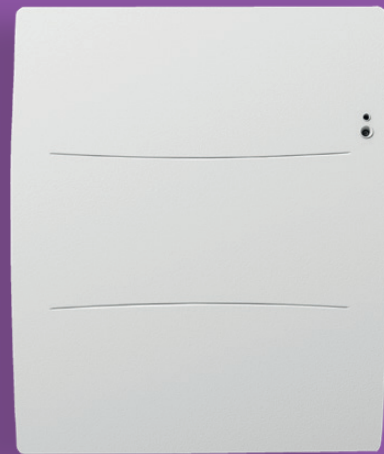

PANEL HEATER

The perfect solution for:

Domestic Homes
Multi Occupancy
Apartments
Private Landlords

The Agilia IO takes everything from the original Agilia electric radiator and upgrades it adding CozyTouch compatibility allowing the user to wireless control Agilia IO radiator through their smartphone or tablet.

Designed with a simplistic but modern symmetrical style, the Agilia IO can be fitted and work with all home deco designs with complete ease. Engineered to be slim and compact, the Agilia IO electric radiator combines comfort, energy, and space saving benefits into one complete elegant radiator.

Engineered to be compact like an electric panel radiator the Agilia IO offers convection heating providing immediate homogeneous heat diffusion which offers the user perfect home comfort and is easy to install allowing you to install multiple Agilia IO radiators with ease throughout the day.

The Agilia IO features double heating elements which provides increased heat up times and with open window decision the Agilia IO electric radiator can adjust its energy consumption to avoid energy wastage. Equipped with easy to use digital controls as well as an energy consumption indicator and 3 programmable modes, the Agilia Io electric radiator offers the user up to 45% energy savings and is ERP compliant.
