WARNING

Caution, hot surface. WARNING: Some parts of this product may become very hot and cause burns on contact. Special care must be taken if children and vulnerable adults are present.

- Children under 3 years must be kept away from this appliance, unless they are constantly supervised.
- Children between 3 and 8 years should only switch the appliance on or off, provided that theappliance has been placed or installed in accordance with these instructions and that these children have supervision or have received instruction on using the appliance safely and understand the potential hazards. Children aged between 3 and 8 years must not connect, adjust or clean the appliance and perform maintenance or adjustment of the settings.
- This appliance can be used by older children of at least 8 years and by people with physical, sensory or mental capabilities or lack of experience or knowledge, if they are monitored correctly or instructions for using the appliance safely given to them and if the risks were understood. Children should not play with the appliance. Cleaning and maintenance by the user should not be performed by children without supervision.
- This appliance may only be plugged in or connected by an authorized person, according to current local regulations.
- If the power cable is damaged, it should be replaced by the manufacturer, their after-sales department or by a competent person in order to avoid any risk.
- The user manual for the appliance is available from the after-sales department, on the number shown on the warranty form included with this manual.
- When the appliance is first switched on and set to heat, a light odour may be emitted, this can be ignored as it is a result of the manufacturing process.

CAUTION: For safety reasons, and to avoid overheating, do not cover the heating appliance.

Appliances carrying this symbol must never be disposed of with household waste, but must be collected separately for recycling. At the end of their life, products must be collected and recycled according to local regulations.

When an appliance is installed at a higher altitude, the air outlet temperature rises (around 10°C per 1000 m rise in height above mean sea level).

INSTALLATION

Where to install the device? (see page 1)

- This appliance has been designed to be installed in residential premises. Please consult your dealer if other circumstances apply.
- The appliance must be installed in line with the current IET Wiring regulations and Building regulations.
- The appliances are class II and protected from water splashes to IP 24. They may therefore be installed in zone 2 of shower rooms. It is forbidden to install the device in zone 1. It must be impossible for anyone using the shower or bath to reach the appliance's controls, however.
 - Respect minimum distances to obstacles when positioning the appliance.
- The appliance's support bracket ensures that there is free space behind the appliance so as not to interfere with its operation. The gap between the appliance and the wall must not be obstructed in any way.

Do not install the appliance (see page 2)

- In a draught that could affect it's operation (beneath a centrally controlled mechanical fan unit, etc.).
 - Near curtains or any other flammable materials.
- The air outlet grid and control unit must be visible at the top of the appliance. It is forbidden to mount a vertical appliance horizontally and vice versa.

Wall mounting (see page 2)

- Release the appliance's latching bar. We recommend you place the appliance flat on the ground. Use a screwdriver to raise the tongue of the fitting, carefully so as not to distort it. While keeping the tongue raised, push the latching bar downwards to release the latches at the top. Pivot the latching bar around the lower latches. Remove the latching bar.
- Fix the latching bar. Place the latching bar on the floor against the wall. Locate the drilling points **A**. These show you where the lower fastenings are. Lift the latching lug, aligning it with the drilling point **A** to locate the drilling points **B**. These show you where the upper fastenings are. Drill the four holes and insert the plugs. If extra support is required, use special plugs (e.g.: in plasterboard). Position the latching bar and screw in place.

- Lock the applianceonto latching bar. Place the appliance at an angle on the supports **\$1**. Pivot the appliance to place it on the supports **\$2**. Lower the appliance into latching bar. The appliance clicks in place, confirming that it fixed and latched. To release the appliance from the latching bar, use a flat-head screwdriver and push the tongue (top left of the latching bar behind the appliance) towards the wall. Lift the appliance while holding the tongue with the screwdriver. Swing it forward then lift it off the supports **\$1**.

Electric connection

- The power supply to the appliance is 220-230V, 50-60Hz.
- A 2-core mains cable is used for connection to the mains, connected via a junction box. (Brown wire = Phase, Blue wire = Neutral).
- In damp atmospheres, such as bathrooms and kitchens, the junction box must be located at least 25 cm from the floor. The appliance's power supply must be connected straight to the mains, after the all-pole cut-off, with a contact opening gap of at least 3mm with no intermediate switch.

MAINTENANCE

ATTENTION! All operations are performed only with the device completely de-energized!

In order to maintain the performance of the appliance, you should use a vacuum cleaner or brush twice a year to remove the dust from the upper and lower grids. Every five years, a maintenance engineer should check the inside of the appliance. In a polluted atmosphere, dirty marks could appear on the appliance's grille. This is because of the poor quality of the ambient air. In this case, it is advisable to check that the room is properly ventilated (fan, air intake, etc.) and that the air is clean. Such dirty marks are no reason to have the appliance replaced under the terms of the warranty.

The casing of the appliance can be cleaned with a damp cloth, do not use abrasive products.

ATTENTION! The housing protection should never be cleaned with abrasive and aggressive products.

ADVICE FOR USERS

Putting the appliance at its maximum setting will not increase the temperature faster. If you are out for several hours, consider lowering the temperature. If you have several appliances in one room, let them operate together, so you have a more uniform temperature while optimizing power consumption. This also applies to an empty room, where it is better to let the appliance run at a lower setting, rather than turn it off completely.

TROUBLESHOOTING

- The appliance is not heating: Check that the installation circuit-breakers are engaged. Check the room air temperature.
- The appliance is constantly heating: check that the appliance is not in a draught, or if the temperature setting has been changed.
- The appliance does not follow the programmed commands: If there are any problems (thermostat jammed, etc.) cut the appliance power supply (fuse, circuit-breaker, etc.) then restart the appliance after 5 mins. If the problem often occurs check the power supply from your energy provider.

FIRST SWITCHING ON

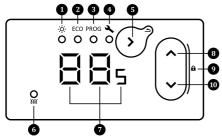

The ON/OFF button is located on the back side of the control unit.

 Set the ON/OFF button into position «I» – to switch on the appliance. When switched on for the first time, the operating mode is Comfort (by default, the heating temperature is 19°C).

- Set the ON/OFF button into position «**0**» - to switch off the appliance.

Please use this button only when you want to stop the heating for a long time (out of heating season).

CONTROL UNIT

- Lock / unlock (long press on 2 buttons)
- n Decrease

OPERATING MODES

3 heating modes are available:

Comfort mode – Allows you to set and adjust normal operating temperature (this temperature is also applied to the Comfort phase in Prog mode).

Eco mode – Allows you to set and adjust Eco temperature (this temperature is also applied to the

Eco phase in Prog mode).

Prog mode – The appliance follows the preset programs for each day of the week. You can change these programs and change time for the Comfort,

Eco or heating off phases.

Note: in **Prog mode**, the appliance automatically will ask you to set the time and day of the week, if it's not set yet.

TEMPERATURE REGULATION

In Comfort mode – Press the button (until the indicator below the pictogram : ights up. The screen shows the last temperature setpoint in Comfort mode (19°C by default). The temperature setpoint can be adjusted between 12°C to 28°C with steps of 0.5°C using the buttons \triangle / $\overline{\bigcirc}$.

In case of long-term absence, you can set the temperature setpoint to 7°C (frost protection

temperature).

In Eco mode – Press the button (i) until the indicator below the pictogram FCO lights up. The screen shows the last temperature setpoint in Eco mode (15.5°C by default). The temperature setpoint can be adjusted between 10°C to 19°C with steps of 0.5°C using the buttons ⚠ / 🔽 . The maximum Eco temperature setpoint is limited (2°C below the Comfort temperature).

In case of long-term absence, you can set temperature setpointto 7°C (frost protection temperature).

In Prog mode – Press the button (i) until the indicator below the pictogram PROG lights up. It is not possible to change the temperature setpoint in this mode. Use the buttons (A) / (V) to see current operating mode of the appliance follows up. If the

screen shows: ☐ ☐ The appliance follows temperature setup in Comfort mode. To change Comfort temperature, go to Comfort mode.

🖺 🖹 – The appliance follows temperature setup in Eco mode. To change Eco temperature, go to Eco mode.

☐ ☐ – The appliance does not heat (possible only in Prog mode).

To change preset programs in Prog mode, go to appliance settings.

i It is recommended to use Eco / Comfort transition, which is more energy efficient than

LOCK APPLIANCE CONTROL BOX

To avoid adjustment by children, you can lock appliance control box pressing buttons A and at the same time. Hold buttons around 3 seconds.

The screen shows 📙 🔁 . Appliance control box is

Make same operation to unlock the appliance

APPLIANCE SETTINGS

Off / Comfort transition.

Press the button of until the indicator below the pictogram \(\mathbb{\chi}\) lights up. The settings menu contains: 님 - SETTING THE TIME AND DAY OF THE

Using buttons ♠ and ♥, select parameter ☐ ☐. Set the hour ☐ ☐. Set the minute ☐ ☐. Set the day of the week ☐ ☐ (1 – Monday, 2 – Tuesday...). Note: after the appliance has been switched Off / On, it may be necessary to re-set the time and day of the week.

- ACTIVATION / DEACTIVATION THE OPEN WINDOW DETECTION

Allows detection of the temperature change caused by opening and closing a window. If you forget to switch off the appliance before long-term ventilation of the room, this function prevents unnecessary heating.

Using buttons ♠ and ♥, select parameter 🗄 🖯 . Activate / deactivate function of the open window

detection ($\square \square / \square \square$).

If the appliance detects thata window has been opened, the parameter $\square \square$ flashes on the screen and appliance switches automatically to frost protection mode (7°C).

If the appliance detects that a window is closed if the cycle is stopped manually, the parameter 🗏 🗏 will disappear from the screen and the appliance will return to the previous operating mode.

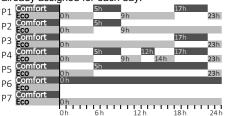

To manually stop the open window detection cycle:

- Confirm using button 67.

Note: it is not recommended to use this function in rooms with a draught, for example in corridors or in rooms near the front door.

7 - PROGRAM FOR EACH DAY OF THE WEEK

7 programs are preset. By default, programs are already assigned for each day.

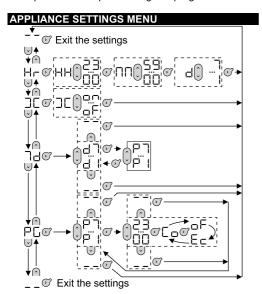

It is possible to change the program for the day you want. Using buttons (A) and (V), select parameter Select a day for programming e.g., Monday $\square \square$. Select program from P1 to P7 for selected day.

Repeat these steps to select the program for each

day of the week.

戸口 - PROGRAMS CHANGE

It is possible to change the preset programs. For each program (from P1 to P7) it's possible to select operating mode hourly (from 0 to 23 hours). Using

EXPERT MENU

To access the advanced functions of the device, press and hold 2 buttons around 3 seconds.

| □ | CALIBRATION

It is possible to adjust the temperature measured by the appliance according to the room temperature. The calibration value is from -3°C to +3°C comparing to the temperature shown on the screen.

□ – MAXIMUM TEMPERATURE It is possible to change the temperature, which cannot be exceeded (from 19°C to 28°C). By default, the maximum temperature is 28°C.

It is possible to switch off the heating indicator. when appliance is in standby mode. To switch off the indicator, choose parameter «oF».

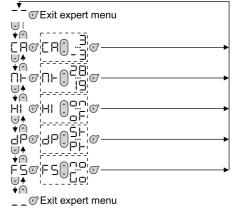

러부 - SCREEN

It is possible to choose which temperature to show on the screen before switching to standby mode:

- «St» to show the set temperature.
- «Pt» to show the measured temperature.

F 5 - FACTORY SETTINGS

It is possible to reset appliance to factory settings. parameter «Go». Comfort temperature set-point 19°C, Programming default.

WARRANTY

KEEP THIS DOCUMENT IN A SAFE PLACE

(This certificate should only be presented if you are making a complaint)

- This warranty is applicable for 2 years from the date of installation or purchase and is valid for no more than 30 months from the date of manufacture in the absence of additional supporting documents
- The warranty covers the replacement or supply of parts in return for those found defective and does not provide for any compensation for damages.
- Labour costs, travel and transportation are the responsibility of the user.

- Damage associated with improper installation, power supply network that does not meet the standards, improper use or failure to follow the instructions in the manual is not covered by the warranty.

This certificate should be presented only when filing a complaint with the distributor or installer, along with the seller's invoice.

- To apply for warranty service, please contact your distributor or installer. If necessary, you can also contact Atlantic | PO Box 103, National avenue, Kingston Upon Hull, HU5 4JN.
