The perfect solution for:

# Bedrooms Guest Rooms Home Offices Conservatories

Oniris is a modern and stylish digital electric panel heater that features fast-heating elements encased by an aluminium surface. Two smooth and curved grooves create this aesthetically pleasing panel heater design.

This heater includes occupancy detection, which automatically reduces heat if the room is empty, as well as open window detection that reduces the heater's heat output. With these features, Oniris is both efficient and convenient, making it a smart choice for any modern home.
